Acceptance Criteria:

As an app user, I would like to enter a search query and see results drawn from data stored within the app.

Settings Feature - Event Attendees - ID: 10442

1. Account Settings - ID: 45526

Description:

Manage payments (Billing Informations) Subscription Notifications - toggle button Email notifications SMS notifications Deactivate account - toggle button Log out - pop out - Yes/Cancel

Acceptance Criteria:

As a User type, I would be able to manage my payments (billing information). As a User type, I would be able to see subscription packets. As a User type, I would be able to enable/disable notifications. As a User type, I would be able to deactivate my account. As a User type, I would be able to logout.

2. Change Password - ID: 45527

Description:

Current Password (password field) New Password (password field) Confirm Password (password field) Change Password (button)

Acceptance Criteria:

As a User type, I would be able to fill provided fields in order to change the password.

3. Configuration & Setup of Contact-us module - ID: 45528

Description:

Configuration & Setup of Contact-us module

Acceptance Criteria:

4. Configuration & Setup of Frequently Asked Questions module - ID: 45529

Description:

Configuration & Setup of Frequently Asked Questions module

Acceptance Criteria:

5. Contact-us Module - ID: 45530

Description:

Title, Email, Description -> send

Acceptance Criteria:

6. Frequently Asked Questions Module - ID: 45531

Description:

Frequently Asked Questions

Acceptance Criteria:

7. Invite Friends - ID: 45532

Description:

Send invite link app-share link Copy (button) Email address (text field) Send (button) Close (button)

Acceptance Criteria:

As a User type user, I would be able to invite friends to use the app via email. As a User type user, I would be able to see my personal app-share link and to copy it.

8. Log Out - pop out - ID: 45533

Description:

Are you sure you want to Log Out Cancel/Yes buttons

Acceptance Criteria:

As a User type, I would be able to log out of the app.

9. Successfully Removed/Deleted pop-up - ID: 45534

Description:

Successfully removed/deleted Close (button)

Acceptance Criteria:

As a user type, I would be notified that a profile is successfully removed. As a user type, I would be able to close the pop-up by clicking on the close button.

10. Support/ Send Feedback - ID: 45535

Description:

Email address (text field) Message (text field) Submit (button) Back (button)

Acceptance Criteria:

As a User type, I would be able to send feedback by entering my email address and writing the message. As a User type, I would be able to send feedback by clicking the submit button. As a User type, I would be able to return to the previous screen by clicking the back button.

Social Authentication Feature - Event Host/Attendees - ID: 10443

1. Apple Sign in - included in Social Login Module - ID: 45536

Description:

https://developer.apple.com/documentation/sign_in_with_apple/sign_in_with_apple_rest_api

Acceptance Criteria:

We will use this integration for option to sign in via AppleID.

2. Configuration & Setup of Social Login module - ID: 45537

Description:

Configuration & Setup of Social Login module

Acceptance Criteria:

3. Facebook Integration - included in Social Login Module - ID: 45538

Description:

<https://developers.facebook.com/>

Acceptance Criteria:

We will use this integration for any connection with Facebook and getting data from there (analytics, signing in)

4. Forgot Password Screen - ID: 45539

Description:

Enter registered email (input) Reset Password (button) - sends a password reset link on the user's email, by clicking on the link users will be able to change their password (SendGrid API) Cancel (button)

Acceptance Criteria:

As a User type User, I would be able to enter my email and click on the reset-password button. As a User type User, I would be able to cancel the process by clicking the cancel button.

5. Google Sign in - included in Social Login Module - ID: 45540

Description:

<https://developers.google.com/identity/sign-in/web/sign-in>

Acceptance Criteria:

We will use this integration for signing in via Google feature.

6. Social Login Module - ID: 45541

Description:

Description: In this module users will be able to register and sign in through Facebook, Google, Apple, or custom login credentials. A user will also be able to reset the password if the password has been forgotten. The module consists of two generic modules both Frontend and Backend that are used to create and store things locally. Features: 1. Ability to login/signup using custom email and password. 2. Ability to login/signup using social login like "Apple, Facebook, and Google". 3. Ability to reset/forgot password - for this, a recovery email link is generated on the registered email address. As an Admin user type, I would be able to search for users by entering keywords in the search field. As an Admin user type, I would be able to filter users by role. As an Admin user type, I would be able to see the user full name, role, phone number, and email. As an Admin user type, I would be able to edit user details and delete user from the admin panel. As an Admin user type, I would be able to add member full name, email, select role, and click on the add user button and have the option to flag/unflag users.

5. Matches Made History - ID: 45688

Description:

Display a list of all matches made on the application with a date and location stamp. Name and Profile Picture Date Matched Town

Acceptance Criteria:

As an event host or super admin user type, I would be able to see all the matches made on the application

Basic Web Landing page - Event Host/Attendees - ID: 10464

1. About the app/ About us - ID: 45631

Description:

Details will be provided from the Client Textual file Pictures Video Back (button)

Acceptance Criteria:

As a User type, I would be able to see content in the app section. As a User type, I would be able to return to the previous screen by clicking the back button.

2. Landing page - ID: 45632

Description:

- Logo or picture/animation for the app
- Icons to download the mobile version of the app from Apple store or Play store
- About us
- FAQ
- Contact us In the bottom of the screen will be>
- Terms and Conditions
- Privacy Policy
- Sign In As An Event Attendee (Button)
- Sign In As A Host (Button)

Acceptance Criteria:

- As a User type, I would be able to see a logo or picture
- As a User type, I would be able to download mobile apps via Apple store or Google Play store
- As a User type, I would be able to go to About us section
- As a User type, I would be able to go to FAQ section
- As a User type, I would be able to use Contact us form
- As a User type, I would be able to read Terms and Conditions and Privacy Policy

7. Support/ Send Feedback - ID: 45633

Description:

Email address (text field) Message (text field) Submit (button) Back (button)

Acceptance Criteria:

As a User type, I would be able to send feedback by entering my email address and writing the message. As a User type, I would be able to send feedback by clicking the submit button. As a User type, I would be able to return to the previous screen by clicking the back button.

Bookings (Event) Feature - Event Attendees - ID: 10465

1. Book Event screen - ID: 45634

Description:

Event Main Photo Event Title Event happening Choose Date - List of dates in case there are multiple Event starts at [time], and end at [time] Event Price Book (button)

Acceptance Criteria:

As a User type, I would be able to see the event photo, title, choose date, see start and end time, price, and confirm booking by clicking on the book button.

2. Confirmation - pop up - ID: 45635

Description:

Are you sure you want to perform the chosen action? Yes (button) Cancel (button)

Acceptance Criteria:

As a "User" type user, I would be able to confirm or dismiss the action.

3. Event Details screen - ID: 45636

Description:

Event Main Photo Event Title Event Price Event happening [Date, Multiple Dates, From-To Dates] Event Starts at [time] Event Ends at [time] Event Location - full address Event Description Event Gallery Interested (button) Book Event (button)

Acceptance Criteria:

Acceptance Criteria:

As a User type, I would be able to search for favorites by entering the keyword in teh search field. As a User type, I would be able to see the list of favories. As a User type, I would be able to remove the item from favorites by clicking on the favorite icon. As a User type, I would be able to see favorite details by clikcing on teh see details button.

6. Filter screen - ID: 45639

Description:

Section 1 Back (button) Screen Title [Filter] Section 2 Select desired start and end days - Calendar Desired days (button) Desired Time (button)
Budget (button) Activity Location (button) Apply (button) - loads activities related to chosen filters

Acceptance Criteria:

As a user type, I would be able to go back to the previous screen by clicking on the back button. As a user type, I would be able to see the screen title and click on the hamburger menu icon. As a user type, I would be able to select desired dates, days and time. As a user type, I would be able to set the activity budget. As a user type, I would be able to set the activity location, ages, grades, interests. As a user type, I would be able to apply filters by clicking on the apply button.

Calendar (Local) Feature - Event Attendees - ID: 10466

1. Calendar Screen - ID: 45641

Description:

Title Description Calendar view Done (button) Back (button)

Acceptance Criteria:

As a User type, I would be able to go back to the previous screen by clicking the back button. As a User type, I would be able to set the calendar.
As a User type, I would be able to set time. As a User type, when I click the done button I should be able to set the calendar and time successfully.

2. Configuration & Setup of Appointment-local module - ID: 45642

Description:

Configuration & Setup of Appointment-local module

Acceptance Criteria:

3. Configuration & Setup of Local Calendar module - ID: 45643

Description:

Configuration & Setup of Local Calendar module

Acceptance Criteria:

4. Local Calendar Module - ID: 45644

Description:

view(day/monthly/weekly), populate from backend, Add event to calendar

Acceptance Criteria:

Device location access Feature - Event Attendees - ID: 10467

1. Device location access pop-up - ID: 45645

Description:

"Are you giving permission for app to access your current location? "Allow always" button "Allow only when using the app" button "Don't allow" "

Acceptance Criteria:

As a user type, I would be able to allow/disallow app to use my location.

Favorites Feature - Event Attendees - ID: 10468

1. Favorites screen - ID: 45646

Description:

Search (search filed) List of favorites Price Favorite's Photo Favorite's Name Favorite (icon) - click to remove from favorites See Details (button)

Acceptance Criteria:

As a User type, I would be able to search for favorites by entering the keyword in teh search field. As a User type, I would be able to see the list of favories. As a User type, I would be able to remove the item from favorites by clicking on the favorite icon. As a User type, I would be able to see favorite details by clikcing on teh see details button.

Finance Transaction Feature - Event Host - ID: 10469

1. Collect Transaction Fees - ID: 45647

Description:

This feature allows the user to view and confirm any transaction fee applied. It contains a pre-defined template with text fields, a complete list of applicable fees and amount due, a full screen background, a header, and a footer with custom colors.

Acceptance Criteria:

As a buyer, I would like to view the transaction fee applicable on the product I am interested in purchasing before making the final payment.

2. Transaction Pending screen - ID: 45648

Description:

Transaction pending message

Acceptance Criteria:

As a user type, I would be able to see a pending message while I waiting for transaction to be finished.

3. Transactions details pop-up - ID: 45649

Description:

Sender/Receiver Profile Photo or logo; Sender/Receiver Name Amount paid/received Transaction ID Type Date & Time Make return (button)

Acceptance Criteria:

As a user type, I would be able to see receiver/sender photo, name, amount, transaction ID, type, date and time. As a user type, I would be able to click on a return button and start the return process

4. Transactions screen - ID: 45650

Description:

Account Balance Search (input text) Filters Start date End Date Transaction type (drop-down) All Incoming Outgoing Loads up Cash out Clear Filters (button) List of transaction sorted by the latest Sender/Receiver Profile Photo or logo Sender/Receiver Name Transaction date and time Amount - on click opens transaction details screen

Acceptance Criteria:

As a user type, I would be able to see the total amount in transactions. As a user type, I would be able to search for transactions by entering the keyword in the search field. As a user type, I would be able to filter transactions by date and type. As a user type, I would be able to clear filters. As a user type, I would be able to see all transactions that match filters sorted by the newest. As a user type, I would be able to see the Sender/Receiver photo, name, transaction date and time, and amount. As a user type, I would be able to click on a specific transaction and open details .

5. Transaction Succesful screen - ID: 45651

Description:

Transaction successful Close (button)

Acceptance Criteria:

As a user type, I would be able to see the transaction confirmation message and close the screen by clicking on the close button.

Flag user/content Feature - Event Attendees - ID: 10470

1. Confirmation - pop up - ID: 45652

Description:

Are you sure you want to perform the chosen action? Yes (button) Cancel (button)

Acceptance Criteria:

As a "User" type user, I would be able to confirm or dismiss the action.

2. Report/flag reasons pop up - ID: 45653

Description:

*Functionality mandatory for social media type of the apps. Allow users to report posts with inappropriate content. Why are you reporting this? Spam Pornography Hatred and bullying Self-harm Violent, gory and harmful content Child porn Illegal activities (e.g. drug uses) Deceptive content Copyright and trademark infringement Other (input) *Users must be able to click on any of these reasons and specific posts will be flagged and the admin will be notified of this

Acceptance Criteria:

As a User type, I would be able to choose the reason for flagging/reporting post.

Google Maps Feature - Event Attendees - ID: 10471

1. Configuration & Setup of Maps module - ID: 45654

Description:
Configuration & Setup of Maps module

Acceptance Criteria:

2. Geolocation - Included in RN Maps Module - ID: 45655

Description:
<https://developers.google.com/maps/documentation/geolocation/overview>

Acceptance Criteria:
We will use this integration for maps, tracking and location data

3. Google Maps API - ID: 45656

Description:
<https://developers.google.com/maps>

Acceptance Criteria:
We will use this integration for accessing different data from the Google maps

4. Google maps for directions - ID: 45657

Description:
<https://developers.google.com/maps/documentation/directions/overview?hl=en>

Acceptance Criteria:
We will use this integration for getting data from Google maps for directions

5. Maps Screen - ID: 45658

Description:
Screen with the map and option to zoom in and zoom out Screen with the map and directions to some selected place Search for places and addresses This will be used to display where in person events are taking place. This can also be used to get directions to in person events. *This feature displays a map that lists locations as a user scrolls the map view. Locations can be shown based on the user's location or predetermined points of interest. Live location updates can be configured within the map view.

Acceptance Criteria:
As a user type, I would be able to see a map which can be zoomed in and zoomed out. As a user type, I would be able to see a map and directions to some place. As a user type, I would be able to search for specific places and addresses.

6. Maps (ver2) Module - ID: 45659

Description:
Description: Maps module is a react native based module. Helps user to search and navigate to the required locations. Features: 1. Display route between origin and destination. 2. Multiple markers 3. Drag & drop origin and destination marker 4. Set dynamic origin 5. Search origin and destination Screens: 1. Maps Screen The maps screen contains the map where a user can set his origin and destination by searching and dragging markers. He can enable or disable the directions.

Acceptance Criteria:

7. Places API - Included in RN Maps Module - ID: 45660

Description:
<https://developers.google.com/maps/documentation/places/web-service/overview>

Acceptance Criteria:
We will use this integration to fetch a list of places based on a user's location or search string.

Payments Feature - Event Host/Attendees - ID: 10472

1. Add Card details screen - ID: 45661

Description:
First Name Last Name Address Line 1 Address Line 2 City State Zip Country Card Number Card expiration CVV Update (button) **Hosts Pay The Super Admin For App Usage Attendees Pay Hosts For Entrance To Event Fees**

Acceptance Criteria:
As a User type, user type I would be able to enter first name, last name. As a User type, I would be able to enter an address. As a User type, I would be able to enter the city and state. As a User type, I would be able to enter my card details. As a User type, when I click the update payment button, I should be able to update payment details and save my added card successfully.

2. Apple in-app purchases - Included in payment module - ID: 45662

Description:
<https://developer.apple.com/in-app-purchase/>

Acceptance Criteria:
We will use this integration for Apple in app payments.

3. Apple Payment Integration - ID: 45663

Description:
<https://developer.apple.com/apple-pay/>

Acceptance Criteria:
We will use this integration for Apple apps in app purchases.

4. Configuration & Setup of Payments Module (ver1.1) - ID: 45664

Description:
Configuration & Setup of Payments Module (ver1.1)

Acceptance Criteria:

5. Confirmation - pop up - ID: 45665
Description:
Are you sure you want to perform the chosen action? Yes (button) Cancel (button)

Acceptance Criteria:
As a "User" type user, I would be able to confirm or dismiss the action.

6. Payments - ID: 45666

Description:
Choose payment option from dropdown menu: Visa, Mastercard, Paypal Cardholder Card number Expiration date CCV Save this card details - checkbox **Hosts Pay The Super Admin For App Usage Attendees Pay Hosts For Entrance To Event Fees**

Acceptance Criteria:
As a User type, I would be able to input card details. As a User type, I would be able to save card details using a checkbox. As a User type, I would be able to click on the continue button that leads me to the next point.

7. Payments history - ID: 45667

Description:
History of all payments and invoices Specific payment/invoice Payer name Payment date/time Amount paid Download receipt (button) Download full report (button) Choose date (from/to) Download (button) *includes pdf template design effort

Acceptance Criteria:
As a user type, I would be able to see a list of all payments and invoices with the given details. As a user type, I would be able to download full report in pdf by providing the start and end date.

8. Payments Module (ver1.1) - ID: 45668

Description:
Description: The module consists of two generic modules both Frontend and Backend that are used to create and store user's info locally and process payments through the app. A user can process the payments via Apple pay, or Google pay or he can use his credit card. Features: 1. Ability to process payments using i. Apple pay ii. Google pay iii. Credit cards. 2. inAPP Purchase (Apple) Screens: 1. Home Screen User can see a list of Transactions 2. Add/remove Card

Acceptance Criteria:

9. Stripe Payment Integration - Included in Payment Module - ID: 45669

Description:
<https://stripe.com/docs/keys> This feature integrates Stripe's payment gateway and uses it to make/collect payments within the app.

Acceptance Criteria:
This feature integrates Stripe's payment gateway and uses it to make/collect payments within the app.

10. View a payment - ID: 45670

Description:
List of Payments by project selected Date Description Billable Hours Total Total Hours (Number field) Total Paid (Number field) Print-pdf (Button)

Acceptance Criteria:
As a user type, I would be able to view individual projects and see the payment history of that project. As a As a user type, I would be able to see all the details of the payment. As a As a user type, I would be able to print the invoice as a PDF file.

QR Code Feature - Event Host - ID: 10473

1. Configuration & Setup of QR code(BE) module - ID: 45671

Description:
Configuration & Setup of QR code(BE) module

Acceptance Criteria:

2. Configuration & Setup of QR code(FE) module - ID: 45672

Description:
Configuration & Setup of QR code(FE) module

Acceptance Criteria:

3. QR code(BE) Module - ID: 45673

Description:

Backend Support for QR Code module

Acceptance Criteria:

4. QR code(FE) Module - ID: 45674

Description:

Description: By using the module, a user can generate a QR code at the backend, and integrate QR code scanning at the front. The module consists of two generic modules both Frontend and Backend that are used to create and store qrcode locally. Features: 1. Ability to generate Qrcode at the backend 2. Ability to scan Qrcode at the frontend Screens: 1. Home Screen By default, the home screen shows the QR scanner where the user can scan the text to generate a QR code.

- 1. QR Generator Screen On this screen, the user generates a QR code by entering text.

Acceptance Criteria:

2. QR Code Generator / QR Code Reader - Included in Django QR Code Module - ID: 45675

Description:

We will use this integration for QR code generation and for QR code reader. <https://www.npmjs.com/package/react-native-qrcode-svg>

Acceptance Criteria:

We will use this integration for QR code Generator / QR Reader in mobile apps. *this is a react-native npm and it can be used only in mobile apps

3. QR Code Scanner - ID: 45676

Description:

This feature allows a user to scan QR codes within the app. It uses the built-in camera from the device to scan the QR codes and retrieve the data encoded. Information encoded often includes web addresses, geographical coordinates, etc.

Acceptance Criteria:

4. React Native QR Code Generator - Included in RN QR Code Module - ID: 45677

Description:

<https://www.npmjs.com/package/react-qr-code>

Acceptance Criteria:

We will use this integration for QR code generation.

5. React Native QR Scanner - Included in RN QR Code Module - ID: 45678

Description:

<https://www.npmjs.com/package/react-native-qrcode-scanner>

Acceptance Criteria:

We will use this integration for accessing barcode scanner.

Bookings (Event) Feature - Event Host - ID: 10474

1. Create Event screen - ID: 45680

Description:

Event Main Photo (Upload) Event Title (Input - Text) Event happening (Calendar Select) Event Type (Drop Down) (Live or Virtual) Event Options (Drop Down) (Optional) (eg: Open Mic, Professional meeting) Choose Date - List of dates in case there are multiple Event starts at [time], and end at [time] Event Price (Input) Invite People (Email Input) Book (button) (Generates QR Code that when scanned redirects the user to the onboarding functionality)

Acceptance Criteria:

As a User type, I would be able to see the event photo, title, choose date, see start and end time, price, and confirm booking by clicking on the book button.

2. Event Details screen - ID: 45682

Description:

Event Main Photo Event Title Event Price Event happening [Date, Multiple Dates, From-To Dates] Event Starts at [time] Event Ends at [time] Event Location - full address Event Description Event Gallery Interested (button) Book Event (button)

Acceptance Criteria:

As a User type, I would be able to see event details such as event name, photo, location, available dates and time, description, photo gallery, etc. As a User type, I would be able to confirm that I am interested by clicking on the interested button and save the event on my account for potential booking. As a User type, I would be able to book the event by clicking on the book button.

3. Events Screen - Simple - ID: 45683

Description:

Search Bar List of events Date and time Age group Description of event Title of event Confirm (button) Back (button)
