Welcome to our Competitive Programming Course in DevSkill! Today I am going to talk about the rules which you MUST follow throughout the course:

1. You need to be present in all the classes. You can skip classes in an emergency but we won't give PASS CERTIFICATES to any student whose attendance is less than 75%.
2. You have to actively participate in problem-solving in classes and practice contests.
3. Participation in CF rounds in regular manner is a MUST for everyone. We will keep tracking your participation.
4. You can't share the class link with anyone outside the course students.
5. You have to be respectful to your course teacher. Remember, he learns from you as well.
6. If you miss any class, inform your course teacher throughout email. Knocking on facebook will be simply ignored in this case. Write a formal email with a proper explanation.
7. Editorials will be given after each contest. Be patient.
8. Any kind of plagiarism and misconduct in practice contests will not be tolerated.
9. If you are stuck with any problem, you are always welcome to ask your instructor/batchmates. Kindly make it through email/slack channel.
10. You must set your full name (as per course registration) in your Zoom app. Otherwise, the count of attendance will be confused.
11. A student can request for up to 4 class recordings throughout the course.
